The Case of Early.

"The case of John Early, leper, has been an amazing series of demonstrations that American civilization Is yet afflicted with a good deal of the barbarism of the Middle Ages. "Early has been handled in the Dis-

trict of Columbia, in the state of Washington, and elsewhere throughout the country, in a way that shows how liable the public is to fall into panic over what it does not understand. Leprosy is a disease almost maknown in this country. It is said that there are perhaps 300 cases, of it in continental United States.

"Nowhere has provision been made for humane treatment of these unfor FEDERAL PROBE OF tunaces. They are a terror of society, largely because of its inacapacity to determine how it shall deal with them; and the menace which they represent is of course vastly increased by reason of the hesitancy and uncare of lepers we are likely to send certainty of the community in dealing with them.

Early crossed the continent without difficulty after getting away from his asylum in Washington state, traveled on the best trains, and returned to But of necessity they let them care for themselves, and five of them have erable freedom-and one remaining at was authoritatively decided to be a Mr. Råker—Are not the government officials supposed to control them, or did they turn them loose?
